

Monitoring the wetlands area dynamics in the Southern Priaralie

The wetland areas and opened water surface area in the Southern Priaralie for June 2012 are determined by SIC ICWC (Fig. 1, Tables 1,2).

Water surface area of the Eastern and Western parts of the Big Aral Sea was estimated using satellite images:

- Eastern Sea – 1159,7 km²
- Western Sea – 3746,3 km²

According the bathymetric chart the estimated areas correspond to the level= 27, 2 m:

- Eastern Sea: Volume at the level $\approx 1,97$ km³
- Western Sea: Volume at the level $\approx 50,9$ km³
