

General Assembly

Distr.: General
22 December 2025

Eightieth session

Agenda item 71 (b)

Promotion and protection of human rights: human rights questions, including alternative approaches for improving the effective enjoyment of human rights and fundamental freedoms

Resolution adopted by the General Assembly on 18 December 2025

[on the report of the Third Committee ([A/80/545](#), para. 5)]

80/216. The human rights to safe drinking water and sanitation

The General Assembly,

Guided by the purposes and principles of the Charter of the United Nations,

Recalling its resolutions [64/292](#) of 28 July 2010, in which it recognized the right to safe and clean drinking water and sanitation as a human right that is essential for the full enjoyment of life and all human rights, and [78/206](#) of 19 December 2023, entitled “The human rights to safe drinking water and sanitation”,

Reaffirming all previous resolutions of the Human Rights Council regarding the human rights to safe drinking water and sanitation, inter alia, Council resolution [57/13](#) of 10 October 2024,¹

Recalling the Universal Declaration of Human Rights,² the International Covenant on Economic, Social and Cultural Rights,³ the International Covenant on Civil and Political Rights,⁴ the International Convention on the Elimination of All Forms of Racial Discrimination,⁵ the Convention on the Elimination of All Forms of

¹ See *Official Records of the General Assembly, Seventy-ninth Session, Supplement No. 53A (A/79/53/Add.1)*, chap. III, sect. A.

² Resolution [217 A \(III\)](#).

³ See resolution [2200 A \(XXI\)](#), annex.

⁴ Ibid.

⁵ United Nations, *Treaty Series*, vol. 660, No. 9464.

Discrimination against Women,⁶ the Convention on the Rights of the Child⁷ and the Convention on the Rights of Persons with Disabilities,⁸

Recalling also that the human rights to safe drinking water and sanitation are derived from the right to an adequate standard of living and are inextricably related to the right to the highest attainable standard of physical and mental health, as well as to the right to life and human dignity,

Reaffirming the responsibility of States to ensure the promotion and protection of and respect for all human rights, which are universal, indivisible, interdependent and interrelated, and must be treated globally, in a fair and equal manner, on the same footing and with the same emphasis,

Reaffirming also that States have the primary responsibility to ensure the full realization of all human rights and to take steps, individually and through international assistance and cooperation, especially economic and technical cooperation, to the maximum of their available resources, to progressively achieve the full realization of the rights to safe drinking water and sanitation by all appropriate means, including, in particular, the adoption of legislative measures for the implementation of their human rights obligations,

Noting general comment No. 15 (2002) of the Committee on Economic, Social and Cultural Rights on the right to water (articles 11 and 12 of the International Covenant on Economic, Social and Cultural Rights)⁹ and the statement on the right to sanitation of the Committee of 19 November 2010,¹⁰ and taking note of the reports of the Special Rapporteur on the human rights to safe drinking water and sanitation,

Taking note of The United Nations World Water Development Report 2025: Mountains and Glaciers – Water Towers and the summary brief “Mid-term status of SDG 6 global indicators and acceleration needs” from August 2024,

Recalling the Programme of Action of the International Conference on Population and Development¹¹ and outcome documents of review conferences, reaffirming the Beijing Declaration and Platform for Action,¹² the outcome documents of the twenty-third special session of the General Assembly¹³ and the declarations adopted by the Commission on the Status of Women on the occasion of the tenth, fifteenth, twentieth, twenty-fifth and thirtieth anniversaries of the Fourth World Conference on Women,¹⁴ and taking note of the agreed conclusions of the sixty-eighth session of the Commission on the Status of Women,¹⁵

Reaffirming its resolution 70/1 of 25 September 2015, entitled “Transforming our world: the 2030 Agenda for Sustainable Development”, for the achievement of

⁶ Ibid., vol. 1249, No. 20378.

sustainable development in its three dimensions – economic, social and environmental – in a balanced and integrated manner, ensuring that no one is left behind,

Stressing the importance of monitoring and reporting on the implementation of the internationally agreed Sustainable Development Goals and targets, including the Goal on ensuring the availability and sustainable management of water and sanitation for all, in particular since, as shown in the Summary Progress Update 2021 on Sustainable Development Goal 6, the world is off track to ensure by 2030 sustainable management of water and sanitation for all, which also serves as a crucial enabler for achieving other Sustainable Development Goals,

Recalling its resolution 71/222 of 21 December 2016, by which it proclaimed the period 2018–2028 the International Decade for Action, “Water for Sustainable Development”, and its resolution 77/334 of 1 September 2023, entitled “Follow-up to the United Nations Conference on the Midterm Comprehensive Review of the Implementation of the Objectives of the International Decade for Action, ‘Water for Sustainable Development’, 2018–2028”, in which it decided to convene the 2026 United Nations Water Conference to Accelerate the Implementation of Sustainable Development Goal 6 and, in 2028, the United Nations Conference on the Final Comprehensive Review of the Implementation of the Objectives of the International Decade for Action, “Water for Sustainable Development”, 2018–2028,

Recalling also the designation, pursuant to General Assembly resolutions 47/193 of 22 December 1992 and 67/291 of 24 July 2013, of 22 March as World Water Day and 19 November as World Toilet Day, which are important opportunities to promote, among other issues, awareness of the human rights to safe drinking water and sanitation and of the remaining challenges in this regard,

Recalling further the Rio Declaration on Environment and Development of June 1992¹⁶ and its resolution 66/288 of 27 July 2012, entitled “The future we want”, and emphasizing the critical importance of water and sanitation within the three dimensions of sustainable development,

Recalling its resolution 76/300 of 28 July 2022, entitled “The human right to a clean, healthy and sustainable environment”,

Noting the relevant commitments and initiatives promoting the human rights to safe drinking water and sanitation made at recent regional and subregional conferences and meetings,

Affirming the importance of continually improving the availability of high-quality, accessible, timely and reliable disaggregated data on progress related to safe drinking water and sanitation services in households, educational settings, healthcare facilities, workplaces and other settings, including public places, as an indispensable means for States to plan for, implement and monitor the progressive realization of the human rights to safe drinking water and sanitation for all without discrimination,

Welcoming the fact that, globally, from 2015 to 2024, according to *The Sustainable Development Goals Report 2025*, the percentage of the world’s population using safely managed drinking water increased from 68 to 74 per cent, the percentage using safely managed sanitation services increased from 48 to 58 per cent and the percentage with access to basic hygiene services increased from 66 to 80 per cent, while, according to the report on *Progress on Household Drinking Water, Sanitation and Hygiene 2020–2024: Special Focus on Inequalities*, published by the United Nations Children’s Fund and the World Health Organization in 2025, the

¹⁶ *Report of the United Nations Conference on Environment and Development, Rio de Janeiro, 3–14 June 1992*, vol. I, *Resolutions Adopted by the Conference* (United Nations publication, Sales No. E.93.I.8 and corrigendum), resolution 1, annex I.

number of people practising open defecation decreased from 715 million to 354 million during this period,

Deeply concerned that, more than 15 years after the adoption of resolution 64/292, 2.1 billion people lack safely managed drinking water and 3.4 billion people lack safely managed sanitation, including 1.7 billion people without basic sanitation services at home, which represents a global human rights and development challenge, and that achieving universal coverage by 2030 will require a substantial increase in current global rates of progress pursued within a guiding framework aimed at the full realization of human rights,

Deeply concerned also that pandemics exacerbate existing inequalities, and that those disproportionately at risk are women, girls and persons in vulnerable situations, recognizing the need to expand as a matter of utmost urgency access to adequate water and sanitation services, including for menstrual health and hygiene management, and to ensure continued access to existing services in this regard, including sexual and reproductive healthcare services, and gravely concerned that as of 2023 2.3 billion people worldwide lacked basic hand-washing facilities at home, which are urgently needed to prevent the spread of pandemics and other infectious diseases,

Deeply concerned further about the lack of access to adequate water and sanitation services and its dramatic consequences for the overall health situation in humanitarian emergencies and crises, including in times of conflict and natural disaster, and acknowledging that people living in countries affected by armed conflict and natural disasters and in countries particularly vulnerable to the adverse effects of climate change, as well as people living in refugee camps, including in refugee host countries, are more likely to lack access to basic drinking water and to basic sanitation than people living in unaffected countries, while acknowledging the efforts of refugee host countries in improving the situation of people living in refugee camps,

Deeply concerned that women and girls often face, especially in humanitarian emergencies and crises, including in times of armed conflict or natural disaster, particular barriers in accessing water and sanitation and hygiene services, as well as menstrual health and hygiene management, and that they shoulder the main burden of collecting household water and of care responsibilities, including those arising from waterborne diseases, in many parts of the world, restricting their time for other activities, such as education and leisure, or, for women, for earning a livelihood,

Deeply concerned also that achieving universal and equitable access to safe water and sanitation services by 2030 will require up to a sixfold increase in current rates of progress,

Deeply alarmed by indiscriminate attacks and attacks deliberately targeting civilian objects in armed conflict, which may injure personnel and damage civilian infrastructure that are critical to the delivery of essential services to the civilian population,

Deeply alarmed also that water, sanitation and hygiene-related diseases hit children the hardest, while noting that child diarrhoea remains a leading cause of death in children under 5 years of age, and underscoring that progress on reducing child mortality, morbidity and stunting is linked to children's and women's universal and equitable access to safe drinking water and sanitation and that, in humanitarian emergencies and crises, including in times of armed conflict or natural disaster, children suffer the most from interruptions in water and sanitation services,

Deeply concerned that persons with disabilities, especially children, often lack universal and equitable access to safe and sustainably managed drinking water and sanitation and face barriers in accessing water and sanitation facilities that are

accessible and appropriate to their needs, which has an impact on their ability to live independently and participate fully in all aspects of life, including education and employment, which is particularly concerning in situations of homelessness and humanitarian emergencies and crises,

Deeply concerned also that widespread silence, stigma, misconceptions and taboos surrounding menstruation and menstrual health and hygiene mean that women and girls often lack basic information and education thereon, whether in school or out of school, and are excluded and stigmatized, that the enjoyment of their human rights, including the right to the enjoyment of the highest attainable standard of physical and mental health, can be negatively affected and that they are thus prevented from realizing their full potential,

Deeply concerned further that the lack of access to adequate water and sanitation services, including for menstrual health and hygiene management, especially in schools and other educational settings, workplaces, health centres and public facilities and at home, negatively affects gender equality, the empowerment of women and girls and their enjoyment of human rights, including the right to education and the right to the enjoyment of the highest attainable standard of physical and mental health, and recognizing the specific hygiene needs of women and girls during menstruation, and that women have specific hygiene needs during pregnancy, childbearing and rearing and throughout the life course,

Deeply concerned that women and girls are particularly at risk of and exposed to attacks, sexual and gender-based violence, harassment and other threats to their safety while collecting household water and when accessing sanitation facilities outside their homes or, when lacking adequate sanitation facilities, practising open defecation and urination, limiting their ability to move freely and safely in the public sphere,

Deeply concerned also that non-existent or inadequate sanitation facilities and serious deficiencies in water management and wastewater treatment can negatively affect water provision and sustainable access to safe drinking water and that, according to the *United Nations World Water Development Report 2021*, an estimated 80 per cent of the world's wastewater is released into the environment without treatment,

Affirming the importance of regional and international cooperation, where appropriate, as a means to promote the progressive realization of the human rights to safe drinking water and sanitation, with the understanding that it has no bearing on the issues of international water law, including international watercourse law,

Expressing concern that climate change increases the frequency and intensity of sudden-onset natural disasters, extreme weather events and slow-onset events, and that these events have adverse effects on the full enjoyment of all human rights, including the human rights to safe drinking water and sanitation, and recalling the need to accelerate action on mitigation, enhance adaptive capacity, strengthen resilience and reduce vulnerability to climate change, including through adopting a sustainable and integrated approach to resilient water and sanitation systems and water management implemented within a guiding framework aimed at the full realization of human rights,

Noting that adequate responses to the adverse impacts of climate change and the progressive realization of the human rights to safe drinking water and sanitation are linked to the health and sustainability of ecosystems, including aquatic ecosystems, which are also endangered by overexploitation and increasing levels of pollution,

Recalling the commitment to step up efforts on all fronts to tackle desertification, land degradation, erosion and drought, biodiversity loss and water scarcity, which are seen as major environmental, economic and social challenges for global sustainable development and for the realization of the human rights to safe drinking water and sanitation,

Recognizing that, while the implications of climate change-related impacts and environmental damage for the enjoyment of the human rights to safe drinking water and sanitation affect individuals and communities around the world, the consequences are felt most acutely by those segments of the population that are already in vulnerable situations, such as people living in informal settlements, people living in small island States and rural and local communities, and recognizing also that Indigenous Peoples, because of their specific situation and nature, may be among the first to face the direct consequences of climate change owing to their dependence upon and close relationship with the environment and its resources,

1. *Reaffirms* that the human rights to safe drinking water and sanitation, as components of the right to an adequate standard of living, are essential for the full enjoyment of the right to life and all human rights;

2. *Also reaffirms* that the human right to safe drinking water entitles everyone, without discrimination, to have access to sufficient, safe, acceptable, physically accessible and affordable water for personal and domestic use, and that the human right to sanitation entitles everyone, without discrimination, to have physical and affordable access to sanitation, in all spheres of life, that is safe, hygienic, secure, socially and culturally acceptable and that provides privacy and ensures dignity, while reaffirming that both rights are components of the right to an adequate standard of living;

3. *Takes note with appreciation* of the work of the Special Rapporteur on the human rights to safe drinking water and sanitation, and invites him to work, within his mandate,¹⁷ to collaborate and engage with Member States and other stakeholders, including civil society, in achieving the internationally agreed water-related goals and targets;

4. *Welcomes* the appointment of the first Special Envoy on Water of the Secretary-General and takes note of the publication of the United Nations System-wide Strategy for Water and Sanitation in 2024;

5. *Calls upon* States:

(a) To ensure the progressive realization of the human rights to safe drinking water and sanitation for all in a non-discriminatory manner while eliminating inequalities in access, including for individuals belonging to groups at risk and those who are marginalized on the grounds of race, gender, age, disability, ethnicity, culture, religion and national or social origin or on any other grounds;

(b) To prioritize as a matter of urgency the provision of safe drinking water and sanitation services that are accessible to all, including persons in vulnerable situations, especially in densely populated, impoverished and rural areas, as a means of enhancing pandemic preparedness and preventing the spread of infectious diseases;

(c) To protect and restore water-related ecosystems and prioritize, as appropriate, in their water management policies, the human rights to safe drinking water and sanitation for all, in particular those affected by lack of access to safe and adequate water and sanitation due to poverty or water scarcity;

¹⁷ Human Rights Council resolution 60/9.

(d) To implement the internationally agreed Sustainable Development Goals and targets,¹⁸ including the Goal on ensuring the availability and sustainable management of water and sanitation for all, consistent with their obligations under international law;

(e) To take into consideration the New Urban Agenda,¹⁹ which envisages cities and human settlements that fulfil their social function, the full realization of the right to adequate housing as a component of the right to an adequate standard of living, without discrimination, and universal access to safe and affordable drinking water and sanitation;

(f) To ensure access to safe and affordable drinking water and adequate and equitable sanitation and hygiene for all women and girls, as well as for menstrual hygiene management, including for hygiene facilities and services in public and private spaces;

(g) To take measures to empower all women and girls for preparedness in humanitarian emergencies and crises, including in times of armed conflict or natural disaster, by ensuring access to water and sanitation services and implementing gender-responsive policies, plans and programmes that address, inter alia, effective menstrual health and hygiene management and adequate disposal options for menstrual products, without compromising their rights, safety and dignity;

(h) To address the widespread stigma, shame and discrimination surrounding menstruation, menstrual health and menstrual hygiene by promoting educational and health practices in and out of schools in order to foster a culture in which menstruation is recognized as healthy and natural and by ensuring access to factual information thereon, including for men and boys, addressing the negative social norms around the issue, as well as ensuring universal access to hygienic products and gender-sensitive facilities, including disposal and waste management options for menstrual products, while recognizing that women's and girls' attendance at school, university or, for women, work can be affected by negative perceptions of menstruation and lack of means to maintain personal hygiene, such as safe water, sanitation and hygiene facilities in schools, public places and, for women, the workplace;

(i) To promote both women's leadership and their full, effective and equal participation in decision-making on water and sanitation management and to ensure that a gender-based approach is adopted in relation to water and sanitation programmes;

(j) To reduce the time spent by women and girls in collecting household water, in order to address the negative impact of inadequate water and sanitation services on girls' access to education and the full enjoyment of their right to education, including through improved public services and infrastructure;

(k) To protect all women and girls from being physically threatened or assaulted, including from sexual violence, while collecting household water and when accessing sanitation facilities outside their home or when practising open defecation and urination, which is exacerbated where the issue of lack of access to safe drinking water and sanitation requires women and girls to travel longer distances and wait in long queues, including through promoting safe public spaces and improving the security and safety of women and girls through gender-responsive rural and urban planning and infrastructure, as well as through their meaningful participation in planning processes;

¹⁸ See resolution 70/1.

¹⁹ Resolution 71/256, annex.

(l) To promote safe public spaces and improve the security and safety of women and girls through gender-responsive rural and urban planning and infrastructure when accessing sanitation facilities outside their homes or practising open defecation and urination;

(m) To take steps to ensure that water and sanitation facilities and services are accessible for persons with disabilities and apply the principles of universal design in accordance with the Convention on the Rights of Persons with Disabilities to meet the needs of persons with disabilities, especially children with disabilities;

(n) To progressively eliminate open defecation by adopting policies to increase access to sanitation, including for individuals who are vulnerable or marginalized;

(o) To raise international awareness of the issue of waterborne diseases, in particular cholera and child diarrhoea, which can be prevented through safe drinking water and adequate sanitation and hygiene and engaging in partnerships with relevant stakeholders to implement projects aimed at scaling up access to safe water and sanitation in developing countries;

(p) To apply broad and inclusive participatory approaches, consulting and coordinating with local communities and other stakeholders, including organizations of women, girls, persons with disabilities and broader civil society, and the private sector, on adequate solutions to ensure sustainable, equitable and non-discriminatory access to safe drinking water and sanitation;

(q) To enhance efforts to substantially reduce the share of untreated wastewater released into the environment and to ensure that plans and programmes for improving sanitation services take into account the need for appropriate systems for the treatment of wastewater produced, including disposal of infant faeces, with the aim of reducing the risks to human health, drinking water resources and the environment, acknowledging the potential of wastewater reuse;

(r) To identify patterns of failure to respect, protect or fulfil the human rights to safe drinking water and sanitation for all persons without discrimination and to address their structural causes in policymaking and budgeting within a broader framework, while undertaking holistic planning aimed at achieving sustainable universal access, including in instances where the private sector, donors and non-governmental organizations are involved in service provision;

(s) To provide for effective accountability mechanisms for all water and sanitation service providers, including private sector providers, to ensure that they respect human rights and do not cause or contribute to human rights violations or abuses;

(t) To ensure, as appropriate, that their development efforts in the areas of water, sanitation and hygiene are aligned with their human rights obligations under international law;

6. *Calls upon* States and international organizations to provide financial resources and support capacity-building and technology transfer to help countries, at their request, in particular developing countries, to provide safe, clean, accessible and affordable drinking water and sanitation for all;

7. *Calls upon* non-State actors, including business enterprises, both transnational and others, to comply with their responsibility to respect human rights, including the human rights to safe drinking water and sanitation, including by cooperating with State investigations into allegations of abuses of the human rights

to safe drinking water and sanitation and by progressively engaging with States to detect and remedy abuses of the human rights to safe drinking water and sanitation;

8. *Stresses* the important role of the international cooperation and technical assistance provided by States, specialized agencies of the United Nations system and international and development partners, as well as by donor agencies, urges development partners to adopt a human rights-based approach when designing and implementing development programmes in support of national initiatives and plans of action related to the rights to safe drinking water and sanitation, and invites regional and international organizations to complement efforts by States to progressively realize the human rights to safe drinking water and sanitation in accordance with their respective mandates;

9. *Calls upon* Member States, in order to effectively respond to and achieve sustainable, inclusive and resilient recovery from health crises such as pandemics and their consequences, to urgently, inter alia, enhance efforts to realize the human rights to safe drinking water and sanitation, as well as ensure access to hand-washing and hygiene, and, by 2030, implement integrated water resources management, at all levels, including through collaborative approaches, in order to ensure a sustainable supply of water for life, agriculture and food production and other ecosystem services and other benefits;

10. *Also calls upon* Member States to expand international cooperation and capacity-building support to developing countries in water- and sanitation-related activities and programmes, including sustainable water harvesting, environmentally sustainable desalination technologies, water efficiency, wastewater treatment, recycling and reuse technologies;

11. *Further calls upon* Member States to enhance global partnerships for sustainable development as a means to achieve and sustain the Goals and the targets of the 2030 Agenda for Sustainable Development, and highlights that the 2030 Agenda marks a paradigm shift towards a more balanced and integrated plan of action for achieving sustainable development that reflects the universality, indivisibility and interdependence of all human rights;

12. *Reaffirms* that the high-level political forum on sustainable development, under the auspices of the General Assembly and of the Economic and Social Council, has the central role in overseeing follow-up and review at the global level of the Sustainable Development Goals, and encourages Member States to share their experiences and best practices;

13. *Decides* to continue its consideration of the question at its eighty-second session.

*69th plenary meeting
18 December 2025*
